25X1

1. The Werk fuer Fernmeldewesen "HF", Berlin-Oberschoeneweide, is now employing about 6,200 hands. Out of this number, only about 200 joined in the demonstration in connection with the holiday of 7 October 1952.
2. The filter winding shop turns out about 32,000 good grids daily, exclusive of those found imperfect. The discards amount to about 10 to 15 percent, so the total production runs 35,000 to 38,000 pieces.
3. The tube production of the plant depends entirely upon the availability of materials. There is a severe present shortage of "P 2" sheet iron, which is used for making anodes for all types of tubes. There are also shortages of chemicals used in the manufacture of porcelain parts. Mica has been available only in limited quantities for over a year.
